

# *Amanda Campbell*

For **Candidate of the**  
**American Constitution Party**

# Secretary of State

Amanda believes...

- Our national and state constitutions are laws which must be followed, even when politicians find them inconvenient. If our politicians refuse to follow the rules, how can they ask us and our children to behave any differently?
- Voters have the right to set the rules for politicians, not the other way around. Our politicians' only obligation is to live within the boundaries the voters have established.
- Voters have the right to initiate controls upon their governments without fear of politicians' self-serving and arrogant interference. Our initiative process was constitutionally established as part of Colorado's republican system of checks-and-balances, designed to maximize citizen participation and minimize government excesses.
- The Secretary of State is the appropriate officer to stand in defense of those constitutions' on behalf of the people of the state, against legislative onslaught, intrusion, and encroachment. The Secretary can inform the people regarding the nature and progress of legislation; warn legislators and testify in committee when bills under consideration appear unconstitutional; and even file suits to have unconstitutional laws declared so by the court.

“The Secretary of State can be much more in defense of people’s right than a glorified, over paid file clerk.” as business women and paralegal... past business owner... and a constitutionalist... Amanda Campbell say, “Now is the time for the office of Secretary of State to be returned to the control of the people, rather than be concerned with controlling the people.”
